Dear Michael,

Please review the enclosed package I received from OSHA. All along Island Green and (b) (6) denied that anyone worked in the no cut east and west. Now they claim only four. That is absolutely wrong. They also denied stock piling again. That is wrong. But I'm working with OSHA on that end.

It has been almost two years and I'm still nowhere. I received information that is very upsetting.

1. DEP never followed EPA/Federal Government Rules Public Law 94-469 Section 18.
2. DEP does not add up all Aroclor, EPA does. Island Green does not meet requirements for 40CFR Part 761.6, or 761.61(A).
3. Island Green violates CF40 Part 761.20(C).
4. Island Green had hundreds of trees planted with a large truck type tree spade. They cannot account for the soil.
5. I did and saw them stock pile contaminated soil and they denied it.

Hopefully something will soon happen. I am considering a possible law suit against DEP and EPA for numerous reasons. Hope I won't have to go to that extreme.

Dear Kelly:

Enclosed is a package from OSHA. It is unbelievable OSHA is excepting seven samples to determine thousands of feet of trenches. Totally ignoring DEP's 8000 samples and twenty-two folders I.D. No., 9514ECP Act 2.

Then Health and safety indicated "ND" they were wrong. Were they wrong on their test report dated July 24, 2002? They only took samples three inches deep, well clean fill was brought in after work was completed. Low readings could also mean cross contaminated soil. Only seven samples, what a joke.

Now they are reporting four employees exposed. Wrong again. I am working with OSHA to contact or locate others. To date there has been no attempt by anyone to contact the general public.

OSHA will be contacting you. I talked with them today. I can't believe it has now been two years and OSHA has not contacted EPA or DEP. They just receive reports from the violator.

Please call Phyllis Kyner, Area Director for OSHA and Jim Charity at 215-597-4955. I told them I would forward this message to you. This was our second phone conversation today.

I don't believe Island Green is an Act 2. DEP did not follow Federal Government Rules and Standards set by the EPA. Apparently the DEP is like OSHA, they don't communicate with any other agency.

Hope to hear from you soon.
